B) Questionnaires	71

I. Introduction: Cumulative Data File Variables

The cumulative data file combines the data of the 2007, 2008, and 2009 demographic survey studies of Texas lottery players. To produce this dataset, the cross-section cases from the time-series survey studies have been pooled. The total un-weighted cross-section N is 5,095. A variable in the dataset almost always represents a question which has been asked in three survey studies. Nonetheless, the 2009 survey study added thirteen more questions (Q73N-Q85N).¹ A question is worded identically in successive surveys in order that the data are consistent and comparable for measurement. Variables have been consistently recorded since 2007.

II. General Survey Methodology²

Random surveys of adult Texas residents aged 18 and older were conducted. The surveys aimed to measure the citizen participation rates, the distribution and frequency of play, and the demographic profiles of the past-year players and the non-players. Random digit dialing (RDD) was the sampling method used because it offers the best coverage of active telephone numbers and because it reduces sample bias.

The RDD method guarantees the following:

¹ These questions are for Daily 4 Night and Sum It Up with Daily 4 Night.

² The contents of this section derive from the Center for Public Policy (CPP), 2008, Demographic Survey of Texas Lottery Players, <http://www.uh.edu/cpp/tx/lottery2008.pdf>, Retrieved on various dates.

- The conceptual frame and sampling frame match;
- The sample includes unlisted telephone numbers;
- The sampling frame is current, thus maximizing the probability that new residents are included; and
- There is comparability between land line surveys and surveys of cell phone users.

The Center for Public Policy's Survey Research Institute (SRI) (www.uh.edu/cpp/sri.htm) fielded 1,700 telephone interviews. Of these, there were some respondents who did play but subsequent responses revealed that they, in fact, did not. Because these respondents would bias the results for the "Past-Year Player" group, they were dropped from the analysis. In addition, some respondents answered "don't know" to the first question, "Have you played any of the Texas Lottery games in the past year?" These individuals, per the survey instrument design, were not asked any further questions on lottery play and were only read questions about their demographic status. Accordingly, these respondents were not used for the analyses we report below. The remaining interviews of self-reported players and non-players yielded a margin of error of +/- 2.4 percent at the 95 percent confidence level. The data for the survey were collected between July and August.

The standard SRI survey administration and management protocols include:

- The utilization of trained telephone interviewers to conduct the survey.
- Each interviewer completes intensive general training. The purposes of general training are to ensure that interviewers understand and practice all of the basic skills needed to conduct interviews and that they are knowledgeable about standard interviewing conventions.

- Following the usual administration and management protocols, the interviewers also participate in a specific training session for the project.
- Interviewers practice administering the survey to become familiar with the questions.

The Texas Lottery Commission (TLC) provided a survey instrument designed to collect demographic data on adult Texas citizens. The surveys included past-year players and non-players and measured lottery participation rates, the frequency of lottery participation, and lottery spending patterns. The survey instrument used by the CPP was consistently employed from 2007 to 2009.

The major change from surveys prior to 2007 is the addition of cell phone users as part of the overall sample. Previous annual studies of lottery players and non-players in Texas have utilized the standard methodology for conducting random digit dial (RDD) surveys. This entails calling residential telephone numbers (landlines) randomly selected from a list of working numbers in homes that are not business lines. Because RDD sampling includes *unlisted* residential numbers, it is considered superior to methods that rely on published telephone numbers in generating samples.

However, with the rapid increase in cell phone usage, traditional RDD sampling has been increasingly questioned because more and more individuals are exclusive users of cellular phones and therefore are excluded from RDD surveys that rely on traditional methods. With estimates of non-landline phone users now ranging up to 20 percent, sample bias in standard

RDD polling is a major issue in the field. To address this potential problem, Survey Sampling Inc., the largest RDD sample vendor in the United States, has recently begun selling cell phone samples to supplement traditional sets of numbers. The SRI took advantage of this new capacity and bought a cell phone sub-sample of numbers for the Texas Lottery Study in addition to the standard statewide RDD sample. This combination, in our judgment, improves the quality of the overall data by including individuals who might be excluded using traditional sampling methods.

III. Structures of the Variable Descriptions

This code book provides the descriptions of each variable. The structure of the variable description is organized as following:

- Variable name: the variable's name which appears in the dataset
- Question: the questions' wordings which were asked in the surveys
- Type: the types of the variables which are categorized as
 - Numeric
 - Administration: The variables employed as the surveys' administrative purposes
 - Demographics: The variables describing the demographic characteristics of the interviewees
 - General: The variables employed for general purposes such as introductions
 - Questionnaire: The variables employed as the measurement
- Description: the examples of the general explanation, descriptive statistics, and characterization of the variables
- Remark: further information of the variables

IV. VARIABLE DESCRIPTION LIST

1. YR

Year of Study

Type:

Numeric (4-digit)

Description:

2007: N = 1,701; Usable = 1,701

2008: N = 1,700; Usable = 1,695

2009: N = 1,695; Usable = 1,678

Remark:

N = the number of respondents

Usable: the number of respondents used for the analysis

2. Complete

Completion of Interview

Type:

Administration

Description:

CO = Completed

AB = Absent

BU = Busy

NA = No Answer

RE = Refusal

IN = Interrupted

NR = Not Residential, etc

ME = Manipulation error

NE = Not Eligible – Not Registered to
Vote

3. gend

Record Gender of Respondent

Questions:

Is A Respondent Male or Female?

Type:

Demographics

Description:

1 = Male; 2= Female

Introduction of Interviews

General

1 = Yes- Respondents allowing
interview and continue with survey

2 = No- Discontinue

20. Q1

Questions:

Type:

Description:

Remark:

Question 1

Have you played any of the Texas Lottery games in the past year?

Numeric/ Questionnaire (General)

1 = Yes

2 = No

8 = Don't Know

9 = Refuse to Answer

For further information, see questionnaire.

21. Q2

Questions:

Type:

Description:

Question 2

Have you played any of the Texas Lottery games like the scratch off tickets or the ones where you pick numbers in the past year?

Numeric/ Questionnaire (General)

1 = Yes

2 = No

8 = Don't Know

9 = Refuse to Answer

22. Q3

Questions:

Type:

Description:

Question 3

In the past year about how often did you usually purchase Pick 3 Day tickets? Would you say ...

Numeric/ Questionnaire (Pick 3 Day)

1 = At least once a week

2 = At least once a month

3 = A few times a year

4 = Has not played Pick 3 Day

8 = Don't Know

9 = Refuse to Answer

Remark:

For further information, see
questionnaire.

23. Q4

Questions:

Type:

Description:

Question 4

About how many times a week?

Numeric/ Questionnaire (Pick 3 Day)

Open-Ended

9 = Refuse to Answer

Remark:

For further information, see
questionnaire.

24. Q7

Questions:

Type:

Description:

Question 7

About how many times a month?

Numeric/ Questionnaire (Pick 3 Day)

Open-Ended

Remark:

For further information, see
questionnaire.

25. Q8

Questions:

Type:

Description:

Question 8

About how many times a year?

Numeric/ Questionnaire (Pick 3 Day)

Open-Ended

Remark:

For further information, see
questionnaire.

26. Q9

Questions:

Type:

Description:

Remark:

Question 9

On average, about how many dollars do you spend each time you buy Pick 3 Day tickets?

Numeric/ Questionnaire (Pick 3 Day)

Open-Ended

For further information, see questionnaire.

27. Q10

Questions:

Type:

Description:

Remark:

Question 10

How much would you say you spend in a month on Pick 3 day tickets?

Numeric/ Questionnaire (Pick 3 Day)

Open-Ended

For further information, see questionnaire.

28. Q11

Questions:

Type:

Description:

Question 11

How many years have you been playing Pick 3 Day?

Numeric/ Questionnaire (Pick 3 Day)

1 = Less than one year

2 = 1 year, less than 2 years

3 = 2 years, less than 3 years

4 = 3 years, less than 5 years

5 = More than 5 years

Remark:	9 = Don't Know/ Refused For further information, see questionnaire.
29. Q12	Question 12
Questions:	In the past year about how often did you usually purchase the Sum It Up feature with Pick 3 Day tickets? Would you say...
Type:	Numeric/ Questionnaire (Sum It Up feature with Pick 3 Day)
Description:	1 = At least once a week 2 = At least once a month 3 = A few times a year 4 = Has not played Sum It Up feature with Pick 3 Day in the past year 8 = Don't Know 9 = Refused
Remark:	For further information, see questionnaire.
30. Q13	Question 13
Questions:	How many times a week?
Type:	Numeric/ Questionnaire (Sum It Up feature with Pick 3 Day)
Description:	Open-Ended

Remark:	999 = Don't Know/ Refused For further information, see questionnaire.
31. Q14	Question 14
Questions:	About how many times a month?
Type:	Numeric/ Questionnaire (Sum It Up feature with Pick 3 Day)
Description:	Open-Ended 9999 = Don't Know/ Refused
Remark:	For further information, see questionnaire.
32. Q15	Question 15
Questions:	About how many times a year?
Type:	Numeric/ Questionnaire (Sum It Up feature with Pick 3 Day)
Description:	Open-Ended 999 = Don't Know/ Refused
Remark:	For further information, see questionnaire.
33. Q16	Question 16
Questions:	On average, about how many dollars do you spend each time you buy Sum It Up feature with Pick 3 Day tickets?

Type:	Numeric/ Questionnaire (Sum It Up feature with Pick 3 Day)
Description:	Open-Ended 9999 = Don't Know/ Refused
Remark:	For further information, see questionnaire.
34. Q17	Question 17
Questions:	How much would you say you spend in a month on Sum It Up feature with Pick 3 Day tickets?
Type:	Numeric/ Questionnaire (Sum It Up feature with Pick 3 Day)
Description:	Open-Ended 9999 = Don't Know/ Refused
Remark:	For further information, see questionnaire.
35. Q18	Question 18
Questions:	In the past year about how often did you usually purchase Pick 3 Night tickets? Would you say...
Type:	Numeric/ Questionnaire (Pick 3 Night)
Description:	1 = At least once a week 2 = At least once a month

3 = A few times a year

4 = Has not played Pick 3 Night in the past year

8 = Don't Know

9 = Refused

Remark:

For further information, see questionnaire.

36. Q19

Questions:

Type:

Description:

Remark:

Question 19

About how many times a week?

Numeric/ Questionnaire (Pick 3 Night)

Open-Ended

9999 = Don't Know/ Refused

For further information, see questionnaire.

37. Q20

Questions:

Type:

Description:

Remark:

Question 20

About how many times a month?

Numeric/ Questionnaire (Pick 3 Night)

Open-Ended

9999 = Don't Know/ Refused

For further information, see questionnaire.

38. Q22

Questions:

Type:

Description:

Remark:

Question 22

On average, how many dollars do you spend each time you buy Pick 3 Night tickets?

Numeric/ Questionnaire (Pick 3 Night)

Open-Ended

9999 = Don't Know/ Refused

For further information, see questionnaire.

39. Q23

Questions:

Type:

Description:

Remark:

Question 23

How much would you say you spend in a month on Pick 3 Night tickets?

Numeric/ Questionnaire (Pick 3 Night)

Open-Ended

9999 = Don't Know/ Refused

For further information, see questionnaire.

40. Q24

Questions:

Type:

Question 24

How many years have you been playing Pick 3 Night?

Numeric/ Questionnaire (Pick 3 Night)

Description:

1 = Less than one year

2 = 1 year, less than 2 years

3 = 2 years, less than 3 years

4 = 3 years, less than 5 years

5 = More than 5 years

9 = Don't Know/ Refused

41. Q25

Question 25

Questions:

In the past year about how often did you usually purchase the Sum It Up feature with Pick 3 Night tickets?

Would you say...

Type:

Numeric/ Questionnaire (Sum It Up feature with Pick 3 Night)

Description:

1 = At least once a week

2 = At least once a month

3 = A few times a year

4 = Has not played Sum It Up

feature with Pick 3 Night in the past year

8 = Don't know

9 = Refused

Remark:

For further information, see questionnaire.

42. Q26

Question 26

Questions: About how many times a week?

Type: Numeric/ Questionnaire (Sum It Up feature with Pick 3 Night)

Description: Open-Ended
9999 = Don't Know/ Refused

Remark: For further question, see questionnaire.

43. Q27**Question 27**

Questions: About how many times a month?

Type: Numeric/ Questionnaire (Sum It Up feature with Pick 3 Night)

Description: Open-Ended
9999 = Don't Know/ Refused

Remark: For further question, see questionnaire.

44. Q28**Question 28**

Questions: About how many times a year?

Type: Numeric/ Questionnaire (Sum It Up feature with Pick 3 Night)

Description: Open-Ended
9999 = Don't Know/ Refused

Remark: For further question, see questionnaire.

45. Q29

Questions:

Type:

Description:

Remark:

Question 29

On average, about how many dollars do you spend each time you buy Sum It Up feature with Pick 3 Night tickets?

Numeric/ Questionnaire (Sum It Up feature with Pick 3 Night)

Open-Ended

9999 = Don't Know/ Refused

For further question, see questionnaire.

46. Q30

Questions:

Type:

Description:

Remark:

Question 30

How much would you say you spend in a month on Sum It Up feature with Pick 3 Night tickets?

Numeric/ Questionnaire (Sum It Up feature with Pick 3 Night)

Questions:

Type:

Description:

Remark:

Question 36

How much would you say you spend
in a month on Cash 5 tickets?

Numeric/ Questionnaire (Cash 5)

Open-Ended

9999 = Don't Know/ Refused

For further question, see

questionnaire.

53. Q37

Questions:

Type:

Description:

Question 37

How many years have you been playing Cash 5?

Numeric/ Questionnaire (Cash 5)

1 = Less than one year

2 = 1 year, less than 2 years

3 = 2 years, less than 3 years

4 = 3 years, less than 5 years

9999 = Don't Know/ Refused

54. Q38

Questions:

Type:

Description:

Question 38

In the past year about how often did you usually purchase Lotto Texas tickets? Would you say...

Numeric/ Questionnaire (Lotto Texas)

1 = At least once a week

2 = At least once a month

3 = A few times a year

4 = Has not played Lotto Texas in the past year

8 = Don't Know

9 = Refused

Remark:

For further information, see

questionnaire.

55. Q39

Questions:

Type:

Description:

Remark:

Question 39

About how many times a week?

Numeric/ Questionnaire (Lotto
Texas)

Open-Ended

9999 = Don't Know/ Refused

For further question, see
questionnaire.

VI. INDEX

A) The Texas Lottery Districts

The Texas Lottery Commission (TLC) divides Texas into *ten* lottery districts. The Commission uses the county's border lines and zip codes for determining the lottery districts. Ten lottery districts are:

- District 1: Abilene
- District 2: Austin
- District 3: El Paso
- District 4: Houston
- District 5: Irving
- District 6: Lubbock
- District 7: McAllen
- District 8: San Antonio
- District 9: Tyler
- District 10: Victoria

In order to measure the patterns of Texas residents' lottery playing behavior (in terms of the average and mean dollars spent), the lottery district variable (LotteryDistrict) is created. To determine in which lottery districts the resident resided, we looked at the zip codes which the respondents answered to the interviewers.³ In the 2009 survey, each respondent was asked in which

³ The information regarding how the zip codes are determined to be in all ten lottery districts is confidential and must be permitted by the Texas Lottery Commission to obtain the information.

counties he or she lived. Still, we faced difficulty to use the counties to determine in which the lottery districts each respondent lived because several respondents mistakenly provided the city's names rather than the county's names. Meanwhile, the most of the respondents were able to provide the zip codes. As a result, we primarily relied on the zip codes. If the respondents provided error zip codes (i.e., non-Texas zip codes), we then looked at the county's names. If both zip codes and the county's names are in error, we dropped the respondent from the analysis of the lottery districts.

B) Structure of Survey Questionnaires

Each question consists of three parts. The first area introduces the variable's name. The second area (the gray areas) indicates the minimum and maximum values of each variable. It also indicates the dates and times when each variable was created. In some questions, the second area puts a caution when extreme values are put in. As a result, when one uses the dataset, we suggest the data users to consult with the questionnaire, especially looking whether there are extreme values or outliers. The third line is the question content and choices. Some questions are open-ended while others are choice questions.
